Core Domains

Cybersecurity Fundamentals, Security Operations (SOC), Incident Response, Threat Analysis, Information Security Awareness

Profile Summary

BCA graduate with a strong interest in cybersecurity, specializing in phishing analysis, log monitoring, and threat detection. Experienced in identifying indicators of compromise (IOCs) and analyzing system activity to detect suspicious behavior. Combines a foundation in web development and IoT with a growing focus on defensive security and SOC operations. Actively building hands-on projects to develop real-world security skills.

Education

Bachelor of Computer Applications (BCA)	2022 – 2025
<i>University of Science and Technology, Meghalaya — Grade: A</i>	
Class 12 (Intermediate – Humanities)	2020 – 2022
<i>Vivekananda Junior College — 78.2%</i>	
Class 10 (Matriculation)	2019 – 2020
<i>Silchar Collegiate School — 74.2%</i>	

Certifications

- **Google Cybersecurity Professional Certificate (In Progress)** – Coursera
- Design Implementation in Human-Computer Interfaces – NPTEL, IIT Guwahati
- Blockchain Technology – NPTEL, IIT Kharagpur

Skills

Technical Skills: Cybersecurity Fundamentals, Security Operations (SOC), Incident Response, Threat Analysis, Network Security, Python, MySQL, HTML, CSS, JavaScript, Data Handling & Documentation, Microsoft Office.	Soft Skills: Effective Communication, Team Collaboration, Critical Thinking, Adaptability, Problem Solving, Time Management.
--	---

Projects & Experience

Log Analysis Pipeline & Threat Detection Apr 2026

- Developed a Python-based log analysis system to monitor and analyze system authentication logs.
- Implemented regex-based parsing to extract timestamps, IP addresses, and login activity from raw log data.
- Designed detection logic to identify brute-force attacks using time-based correlation of multiple failed login attempts.
- Classified suspicious activities into severity levels (low, medium, high) based on frequency and timing patterns.
- Generated automated reports highlighting potential threats and suspicious login behavior.
- Technologies: Python, Regular Expressions, Log Analysis, Threat Detection.

Phishing Attack Analysis & Detection Project

Mar 2026

- Analyzed a simulated phishing email to identify social engineering techniques such as email spoofing, urgent messaging, and malicious links.
- Identified Indicators of Compromise (IOCs) including suspicious domains, deceptive URLs, and credential harvesting attempts.
- Mapped the phishing attack lifecycle to demonstrate how user interaction leads to unauthorized data access.
- Proposed detection methods including email filtering, URL inspection, and domain reputation analysis.
- Recommended preventive measures such as multi-factor authentication (MFA) and user awareness training.
- Technologies: Cybersecurity Fundamentals, Threat Analysis, OSINT Tools.

HR Recruiter (part-time), ELUCIDATION TODAY

Nov 2025 - Feb @025

- Assisting in end-to-end recruitment processes, including sourcing, screening, and coordinating interviews.

Social Media Team (Contractual), Grove Studio x Balipara Foundation

Dec 2025-Dec 2025

- Worked as a contractual member of the social media team, assisting in content creation, scheduling, and online engagement for Grove Studio under the Balipara Foundation.

Backend Development Intern, Greentree Group (Shanghai)

Aug 2025 – Sept 2025

- Worked with RESTful APIs and optimized database queries to improve performance and scalability.
- Gained practical experience with Node.js, Express.js, and MySQL in a production environment.

Smart Mirror Project

Jan 2025 – Jun 2025

- Developed a Smart Mirror integrating real-time modules such as weather, to-do lists, news, calendar, cryptocurrency tracking, traffic, alarm, and YouTube.
- Focused on IoT integration with a minimalist, user-friendly interface.
- Technologies: Python, Node.js, Electron.js, Tkinter, APIs, Raspberry Pi OS.

Study Website (PonderPod)

Jan 2024 – May 2024

- Created a responsive website with subject-wise study resources.
- Emphasized clean navigation, accessibility, and UI/UX best practices.
- Technologies: HTML, CSS, JavaScript, Figma, PHP, Bootstrap, React.js.

Interests

- Space Science & Astronomy
- Singing & Performing Arts
- Dance
